

Concept

- The country who has agriculture needs

•The country who has agriculture needs

- To kill the weeds on any kind of agricultural crop fields

Operate

- To kill the weeds on any kind of agricultural crop fields
- minimize the amount of chemical liquid (poison for the weeds)

•To kill the weeds on any kind of agricultural crop fields

•minimize the amount of chemical liquid (poison for the weeds)

Manufacture

- We should show the mechanism
- Able to pick up syringe precisely
- Weight < 3.80g
- Should be made from cheap material (max 3000)
- Easy to operate
- Easy to support/repair

- Safety

- **We should show the mechanism**
- **Able to pick up syringe precisely**
- **Weight < 3.80g**
- **Should be made from cheap material (max 3000)**
- **Easy to operate**
- **Easy to support / repair**
- **Safety**

Notes

- Pro's

-

- Could be used anytime

- No labor cost

- Pesticide reaction

- Able to adapt for multiple crops / situations

•Pro's

- Could be used anytime
- No labor cost
- Pesticide reaction
- Able to adapt for multiple crops / situations

•Con's

-

- Difficult to create software
- Easy to use
- Should be light

•Different software needed for different crops

•**Con's**

- Difficult to create software**
- Easy to use**
- Should be light**
- Different software needed for different crops**
